AYSC COVID-19 Outbreak Plan

Revised 20-Jul-2020

Adapted from viaSport sample Outbreak Plan

<https://www.viasport.ca/sites/default/files/ReturntoSportGuidelines.pdf>

Introduction

Early detection of symptoms will facilitate the immediate implementation of effective control measures. In addition, the early detection and immediate implementation of enhanced cleaning measures are two of the most important factors in limiting the size and length of an outbreak. An “outbreak” is two or more cases; a “case” is a single case of COVID-19.

1. Identify the roles and responsibilities of staff or volunteers if a case or outbreak is reported. Determine who within the organization has the authority to modify, restrict, postpone or cancel activities.

Authority to modify, restrict, postpone or cancel activities:

- Safety Officer – Brian Hunter
- Club Coaches – Brian Hunter and Bill Ede
- President – Wes Halliday

Communicate with Township of Langley, relevant health authorities and Club members:

- Communications Manager – Rob Wilson

2. If staff (including volunteers) or a participant reports they are suspected or confirmed to have COVID-19 and have been at the workplace/activity place, implement enhanced cleaning measures to reduce risk of transmission. If you are not the facility operator, notify the facility right away.

All equipment will be thoroughly sanitized after every session. Should staff (including volunteers) or a participant report they are suspected or confirmed to have COVID-19, AYSC will deep clean all equipment.

3. Implement your illness policy and advise individuals to:

- *self-isolate*
- *monitor their symptoms daily, report respiratory illness and not to return to activity for at least 10 days following the onset of fever, chills, cough, shortness of breath, sore throat and painful swallowing, stuffy or runny nose, loss of sense of smell, headache, muscle aches, fatigue and loss of appetite.*
- *use the COVID-19 self-assessment tool at BC COVID-19 Self-Assessment Tool to help determine if further assessment or testing for COVID-19 is needed.*
 - *Individuals can contact 8-1-1 if further health advice is required and 9-1-1 if it is an emergency.*

The recommendations above are outlined in the document “AYSC COVID-19 Illness Policy”.

4. In the event of a suspected case or outbreak of influenza-like-illness, immediately report and discuss the suspected outbreak with the Medical Health Officer (or delegate) at your local health authority. Implement your Illness Policy and your enhanced measures.

In the event of a suspected case or outbreak of influenza-like-illness, AYSC will inform the Fraser Health Authority as well as the Township of Langley's Parks Services Coordinator.

5. If your organization is contacted by a medical health officer in the course of contact tracing, cooperate with local health authorities.

We will cooperate with local health authorities on any requests regarding contact tracing.
